

CREDCO+

Quick & Easy Credit Analysis Tool

More than delivering customer credit reports in seconds, CREDCO+ allows you to quickly and thoroughly analyze credit information by identifying opportunities for pay-offs on tradelines. This means you can view credit reports like never before, allowing you to make more profitable financing decisions.

Take Control

CREDCO+ gives you the control. By formatting bureau information and presenting it in logical, easy-to-understand electronic layouts, CREDCO+ can dramatically improve your credit analysis capabilities. Rather than pouring through pages of credit reports, CREDCO+ allows you to instantly grasp your customers' complete credit picture, including their trade history, bureau score, debt ratio and payment-to-income ratio.

Bureau Manager

The Bureau Manager allows you to display credit information in a variety of formats for simple "at-a-glance" assessment of any credit situation.

Color-Coded Credit Summary

Color-coded elements draw your eyes to the critical information you need to make faster decisions and close more deals.

"What-If Scenarios"

Experiment with "what-if scenarios" to gauge the effects of paying-off tradelines and other debts.

Maximize Your Profits

CREDCO+ can help you increase your profitability. It delivers the credit information you need to match your customer with the best loan package, helping you leverage your overall sales strategy.

Fuel Your Business.
